

NB! Use a dry cloth to dust of the lamp.
For further cleaning use a soft non-
abrasive cloth with warm water
- wipe with a clean soft lintfree cloth.

NB! Always turn off the power before
installing any electric equipment.

NB! If you do not feel secure about
installing this lamp, consult a qualified
electrician before proceeding.

NB! If you do not mount the lamp over
an outlet you can drill a hole in the
canopy for the cord.

- 1 Mount the bracket securely in the ceiling.
- 2 Shorten the cord to desired length and connect the wiring in the cable joint box.
- 3 Secure the cord to the canopy with the hex screw, use the larger supplied allen key. Fasten the canopy to the bracket.
- 4 Grab the cord and the marble and carefully pull up until the socket and adjuster becomes visible.
Fasten the adjuster in the desired place with the smaller supplied allen key. Mounting it low gives the most narrow light cone, mounting it high gives a more wide cone.
- 5 Mount the bulb by twisting it in place. Use a mini GU10.
- 6 Gently pull down the marble until it hits the adjuster.
- 7
